- ▶ Available with or without compression system

Committed to vertical filing solutions since 1915

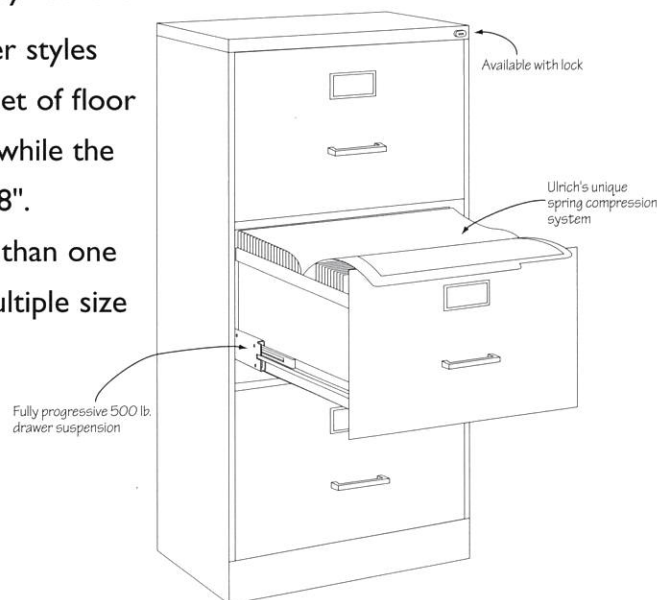

Ulrich Drawerfile

Ulrich Drawerfiles are the ideal solution for efficient storage of documents up to 18" x 24". Many drawer files simply are not designed for the weight of oversized documents. Over time, these drawers become hard to operate and soon will not close without rubbing on the face of the cabinet. Ulrich Drawerfiles are different. With our unique suspension system, Ulrich Drawerfiles are rated for 500 lbs. per drawer and will withstand years of use and abuse. Ulrich Drawerfiles will open fully for easy access to their contents and offer the same compression system found in our premier product, the Ulrich Planfile. This spring compression system with its reinforced folders holds documents perfectly smooth and secure while allowing for easy retrieval.

Ulrich Drawerfiles are available in two-drawer or three-drawer styles and will store up to 16,800 active documents in about 4 sq. feet of floor space. Two-drawer units are perfect for 18" x 24" documents, while the three-drawer units hold a maximum document size of 12" x 18".

Both styles feature an anti-tip mechanism that prevents more than one drawer to be opened at a time. Key locks are available and multiple size documents can be stored together in a single unit. Ulrich Drawerfiles are even available without the compression system for filing X-rays, printing plates or special films. You simply can't buy a better drawer file than Ulrich.
