

Easy Poster and Bulletin Board Storage by Ulrich Cadfile

"We will provide all students the opportunity to learn today so they may contribute to a better tomorrow" -- Clymer School Motto.

Mary Zimmer is the embodiment of this motto. Her picture below shows her enthusiasm for her job as a Library Media Specialist, and the energetic spirit she brings to it every day. Mary utilizes posters and bulletin boards and signs to provide a bright organized and stimulating environment for her elementary and junior high learners. She uses these posters, bulletin boards and signs and changes them frequently to encourage her students to read books, research new concepts, and explore new ideas.

Poster and Bulletin board storage became a problem for Mary. She wanted a way to protect the precious budget dollars she had invested in these items. A storage solution that would keep these items handy when she needed them and tucked neatly out of site when she didn't. – who wants to waste space on storage! But most of all Mary didn't want to waste her valuable time searching for her poster and bulletin board items when they were needed.

She tried a traditional poster rack. However she felt that the whole experience had been a waste of both time and money. Her posters and bulletin board items were not protected, the storage took up a lot of space, was unattractive and worst it was difficult to organize these items and find them when needed.

Mary was very excited when she chose the Ulrich Cadfile as her poster and bulletin board storage solution. And it solved all of her concerns:

- **More time for Lesson Plans** – Better organization means time saved
 - **Organized** - With 20 folders the cadfile provides organization unlike any cabinet on the market.
 - **Time Saved** - easy to find the item you need and easy to refill.
- **Save Budget \$\$** – with the Ulrich Cadfile your items are protected and like new for years. No need to rebuy.
- **Save floor space for your kids** – at only 10 3/4" deep this little cabinet fits almost any where.
- **Easy to update your space** – casters make it easy to move the cadfile. Whether you need to totally redesign your space, or just need to clean the carpet, .
- **Store 1,000 documents or more** – when storing 24" x 36" size there is space for 1,000 documents. If your posters are smaller you can store even more!
